Martin: The single source for bulk material handling systems

Martin is the one you rely on for standard bulk material handling equipment and custom systems and components. Martin supplies units for just about every segment of the industry with a faster delivery than anyone else in the business, avoiding costly downtime. Martin offers a total package in bulk

material handling systems and components, CEMA standard screws, shaftless screws, drag conveyors, bucket elevators, large flights up to 10 ft. diameter and 1 ½" thick, cone screws, ribbon screws, self-lubricating Martin hard iron bearings, and much more! With nearly 60 years of manufacturing experience in material handling Martin has the ability to provide solutions and unsurpassed quality. California Mill Equipment is your local distributor and is ready to help size the proper equipment for your specific application. Call to schedule an appointment with your representative.

Martin conveyor pulleys keep you and your material up and moving!

Martin now offers a complete line of heavy duty conveyor pulleys and components. Martin's conveyor pulleys produce maximum protection against premature failure in harsh applications. This specialty product line is available as stock, and made-to-order with exceptional delivery time. Martin has what it takes to keep your product moving including: drum pulleys, wing pulleys, lagging, bushings, take-up frames, shafting and other specialty products. Martin Heavy Duty Drum Pulleys are aggressively constructed in either standard duty, mine duty, quarry duty, machined and engineered drums.

Wing pulleys are available in standard duty, mine duty, quarry duty and quarry duty AR, and are designed to meet the most common types of failure: wing folding, premature contact bar wear and hub weld fatigue. Other solutions include lagging in vulcanized, cold bond, strip, shell, weld-on, SOF, molded urethane, Holtz and ceramic, and wear parts such as lagged contact bars and wear rims.

California Mill Equipment is moving!

California Mill Equipment is excited to be moving to our new location. The new office is located at 213 C Street in Turlock, California. Our official move in date is Monday, August 15, 2011. Our new office will feature improved office space, a new conference/training room and additional warehouse space. Feel free to stop by and look around.
